RE: Shipping Statements & Keyfob Photos

Hi There,

It's me, Tom. As agreed I'm trying to scope out your target. I managed to find some interesting information, and I've attached some information you'll want to review.

First off – it seems your target's security system was installed by "Maximum Security Company Co", I did some snooping around and found a recent order that I think is related to the installation. You'll see two items on this invoice, but maybe I can find more later.

It seems the security system is using a special I.N.D.I.A.N.A. Sensor made by C.O.L.I.N. Company. I requested a datasheet on this and will ensure it gets to you once available. I did a dumpster dive at C.O.L.I.N. Co headquarters and found they did some recent production, you'll find a packing list that might include some relevant parts. I'll see if we can order some of those parts in for you and make them available, maybe it will help with your job?

I managed to pay off a maid from a hotel he was staying at to take a quick photo of each side of the RFID keyfob being used to protect one of the loot items! Hopefully you can figure out what's encoded on this thing! It's always on the target so I won't be able to get my hands on it physically.

But it turns out our target made a copy of this keyfob onto a RFID keycard, he lends that to his cleaner. I can "borrow" the card from the cleaner BUT I'll need to return it BEFORE March 16th as they are due to clean the place and will notice it missing. This means you can't use the copy for your heist, but you might be able to read the data from it? You're the tech person!

Attached are scans of the documents & photos of the keyfob. Will follow up later with the physical copy.

Expect to hear more from me in the coming weeks. I'll pass along the datasheets as well once I receive them.
